

KEYSTONE CONSULTING L.L.C. OVERVIEW:

Keystone Consulting L.L.C. is an experienced provider of information services for inventors/entrepreneurs. The inventor/entrepreneur has access to various professionals, i.e. Patent Attorney, Engineer, Art Specialist. Their combined input may provide a better understanding of the invention process. Other Keystone services include **filing Patent Applications**, Patent Draftsmen, Web-Site Development, virtual prototypes, etc.

PATENT SEARCH & NOVELTY OPINION LETTER:

The primary concern of any inventor should be the quality of the patent search. There are no specific qualifications required of an individual to perform a patent search. This means there are no standards of quality required to perform a patent search.

- **Keystone Consulting L.L.C., engages ONLY the services of “Registered Patent Attorneys” to determine how the search is conducted.** No patent search can identify all of the potentially relevant prior art. There are over six million patents at the United States Patent and Trademark Office. No patent searcher can possibly be expected to find every patent relevant to your invention. **However, the search conducted conforms to the usual customs and practices applicable to patent searches.**
- Along with the Keystone Service Agreement is a Legal Representation letter from a Registered Patent Attorney. You may contact him/her at any time.
- When the patent search is completed the Registered Patent Attorney will review the search and render an opinion as to the possibility of obtaining patent protection.

Per Separate Agreement:

The Patent Attorney represents you not Keystone Consulting L.L.C.
